Helping Moreland become Energy Smart

Moreland Energy
Foundation
www.mefl.com.au
ph. 9381 1722

A guide for residents

The following list of businesses has been collated to help Moreland residents find products and services which can help implement energy savings at home. Although great care has been taken to select the best businesses in each sector, we acknowledge that businesses change over time and service quality is not necessarily consistent. Therefore MEFL cannot endorse or guarantee the products or services of these businesses and we recommend you exercise full discretion in selecting the provider of the products and services which meets your needs. We welcome feedback on this guide and the products / services supplied through these businesses. We are also interested to hear about other businesses we should consider including in the network. Contact 9381 1722 for more information.

Architects & Designers

Construction Queen

Environmentally Sustainable Building

Contact Paula or Cate

Phone: (03) 9383 1412

Email: cqueen@bigpond.net.au

Web: www.constructionqueen.com

Construction Queen offers a range of services from one off consultancy through to total project management. We can assist you in building design and coordination, permits, water conservation, energy efficiency, recycled building materials and low toxicity building materials. We offer a unique blend of expertise in managing mainstream building projects plus experience in the application of sustainable design and building principles. **5% discount is offered on consultancy services.**

Sunpower Design Pty Ltd

25 Lanark Street

East Brunswick 3057

Phone: (03) 9386 3700

Fax: (03) 9386 3043

Fax: (03) 9387 5006

Mobile: 0400 502 007

Email: jeremy@breathe.com.au

Web: <http://www.breathe.com.au/>

Contact: Jeremy McLeod Architect
BA Env. Des. B.Arch.(Hons) RAIA

At Breathe we practice sustainable architecture and view nature as being integral to the building's fabric. Our designs are interpreted from a holistic perspective and include environmental principles such as, passive solar, collection and recycling of on site water, thorough insulation and double glazing, durable materials with low embodied energy and no toxic building products. Where possible we will use natural energy systems that don't generate pollutants or borrow from then earth's resources and future generations. Our buildings are tough and built to last, using robust, low maintenance materials. We provide affordable architecture and design to any budget and not just for those who live in magazines. We manage the design and building process and deliver buildings on time and on budget. Our clients sit back and enjoy the ride.

NEWEDEN – Sustainable Garden Design and Garden Consultant

Ph. 8300 0790
Mb.0402 202 894
E-mail lounge_lizard@optusnet.com.au
Contact: Diana Cotter

Diana Cotter has 25 years experience designing and planting gardens. She will design gardens to suit your needs and to suit the site. Design considerations include maximising the illusion of space, making the most of rainfall and irrigation, plant choice for soil type, aspect and aesthetic preferences, maximising biodiversity, shade devices and material choices to minimise impact on the environment.

As well as consultation on garden design Diana gives presentations and workshops through Sustainable Gardens Australia on topics including compost and worm farms, water wise gardening and organic vegetable growing.

S e n s e architecture

PO Box 2141
Lygon St Nth
Brunswick East VIC 3057
Mobile: 0425 723 735
Email:
natasha@sensearchitecture.com.au
Contact: Natasha Palich

s e n s e architecture aims to practice architecture in a manner that results in comfortable, habitable and inspiring built form, contributing to an urban landscape that encourages social and cultural identity. *S e n s e* aims to foster personal awareness and appreciation of our individual and collective role in, and contribution to, human and ecological cycles. Natasha is a registered architect with over 9 years experience in residential and institutional work. She has extensive knowledge of sustainable design practices having worked as an advocate for sustainability in the architectural profession.
